EXAMINER

GRIFFIN, WALTER DEAN

ART UNIT	PAPER NUMBER
----------	--------------

1764

DATE MAILED: 09/02/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 09/944,511	<b>Applicant(s)</b> LOMAS, DAVID A.	
	<b>Examiner</b> Walter D. Griffin	<b>Art Unit</b> 1764	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 01 July 2005.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1 and 3-20 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1 and 3-20 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

## **DETAILED ACTION**

### ***Response to Amendment***

The rejections described in the office action mailed on March 7, 2005 have been withdrawn in view of the amendment filed on July 1, 2005.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 4, 5, 6, 9, 10, 12, 13, 15, 16, 17, 19, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Harandi et al. (US 5,372,704).

The Harandi reference discloses a process for converting a hydrocarbon feed stream. The process comprises contacting a hydrocarbon feed with zeolite catalyst particles in a first cracking reactor to produce a cracked product. The cracked product is then separated from the catalyst in a separation vessel. The recovered spent catalyst is then passed to a regenerator where it is regenerated. The cracked product stream is recovered. Also, a feed stream is passed to another reactor where this feed stream contacts a regenerated catalyst having the same composition as the catalyst used in the cracking reactor to produce an upgraded product. The feed to this second reactor is a portion of the cracked product and may have initial and end boiling points that are within the claimed ranges. Catalyst from this second reactor is ultimately returned to the

Art Unit: 1764

regenerator. The upgraded product is kept isolated from at least some of the cracked product. See column 4, line 65 through column 6, line 14; column 9, lines 16-23; column 10, line 15-22 and 48-61; and column 11, lines 11-58.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 7, 8, 11, 14, and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harandi et al. (US 5,372,704).

As discussed above, the Harandi reference does not disclose the reduction of sulfur and nitrogen compounds and does not disclose that hydrogen transfer reactions predominate over cracking reactions in the second reactor.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the process of Harandi by operating the second reactor at

Art Unit: 1764

conditions to produce products as claimed and to promote and inhibit the reactions as claimed because conditions disclosed by Harandi for the second reactor are such that cracking reactions are less than 30%. Additionally, the conditions disclosed by Harandi for the second reactor overlap those disclosed by applicant in the specification. Therefore, one would choose conditions within the ranges disclosed by Harandi in order to promote reactions other than cracking. By doing so, one would obtain results similar to those claimed.

Regarding claim 18, the Harandi reference does not disclose the hydrotreating step. However, Harandi does disclose that feeds that have a large amount of sulfur can be hydrotreated to reduce the sulfur concentration along with a reduction of octane number. Therefore, if the reduction in octane number can be tolerated, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the process of Harandi by hydrotreating the feed to the second reactor in order to reduce the sulfur concentration of the feed so that the final product will have a correspondingly lower sulfur concentration.

### ***Response to Arguments***

The argument that none of the cited art discloses the recitations set forth in the claims is not persuasive because applicant has provided to evidence that the claims distinguish over the Harandi reference.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Walter D. Griffin whose telephone number is (571) 272-1447. The examiner can normally be reached on Monday-Friday 6:30 to 4:00 with alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Glenn Caldarola can be reached on (571) 272-1444. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
